# PAWAN KUMAR

**SOC Analyst (L1) | Blue Team | Threat Detection & Incident Response**

Moradabad, Uttar Pradesh, India | +91 9065721385 | pawanpandey9493@gmail.com
LinkedIn: linkedin.com/in/pawankumar-soc-analyst | GitHub: github.com/pawankumar68
Portfolio: pawankumar68.github.io/portfolio

## PROFESSIONAL SUMMARY

BCA student (expected 2027) targeting an entry-level SOC Analyst (L1) role, with hands-on exposure to network traffic analysis, phishing awareness, email forensics, and secure code review through a cybersecurity internship and personal projects. Comfortable with Linux basics and Python, and currently building SOC fundamentals through the Google Cybersecurity Professional Certificate and TryHackMe practice rooms. Long-term interest in cloud security, with the immediate focus on security monitoring, log analysis, and incident response.

## TECHNICAL SKILLS

- Networking Fundamentals: TCP/IP, OSI Model, Firewalls, Basic Network Traffic Analysis
- Operating Systems: Linux (basic terminal commands), Windows
- Programming: Python (basics)
- Security Tools & Concepts: Splunk (SIEM - foundational knowledge via e-learning), Phishing Awareness, Email Header Analysis, Secure Code Review, Network Sniffing
- Currently Learning: SIEM operations, Incident Detection & Response, Security Monitoring (Google Cybersecurity Professional Certificate)

## PROJECTS

**Email Forensic Toolkit** *Personal Project*
github.com/pawankumar68/email-forensic-toolkit

- Built a Python command-line tool that analyzes .eml files to detect phishing and spoofing, practicing SOC-style email triage.
- Parses headers and the Received chain, checks SPF/DKIM/DMARC results, traces sender origin with an offline GeoIP database, and extracts URLs and attachment hashes.
- Calculates an explainable, rule-based risk score (0–100) with a verdict and reasons, optionally enriched with VirusTotal lookups, and exports IOCs to a CSV log.

**Network Sniffer Tool** *CodeAlpha Internship*
github.com/pawankumar68/CodeAlpha_NetworkSniffer

- Built a Python-based network sniffer to capture and analyze live network traffic packets and inspect header-level data.

**Phishing Awareness Presentation** *CodeAlpha Internship*
github.com/pawankumar68/CodeAlpha_PhishingAwareness

- Designed a Phishing Awareness presentation to educate users on identifying and preventing common phishing attacks.

**Secure Code Review — Login Page** *CodeAlpha Internship*
github.com/pawankumar68/CodeAlpha_SecureCodingReview

- Performed a secure code review on a basic login page to identify common security vulnerabilities such as weak authentication and input validation flaws.

**Biometric Authentication System** *College Hackathon – HackDead Redemption*

github.com/pawankumar68/BioAuth-hackathon-project

- Developed a biometric authentication system prototype as part of a college-level hackathon; received a Participation Certificate.

## EDUCATION

**Bachelor of Computer Applications (BCA) — 5th Semester** *Expected 2027*

*Teerthanker Mahaveer University, Moradabad*

**12th (Senior Secondary) — PCMB, 66.6%** *2022 – 2024*

*Bihar School Examination Board (BSEB)*

**10th (Secondary) — 79%** *2021 – 2022*

*Bihar School Examination Board (BSEB)*

## CERTIFICATIONS

- Google Cybersecurity Professional Certificate — In Progress (approx. 5 months to completion)
- Fundamentals of Cybersecurity — Upgrad
- Introduction to Splunk — Splunk (E-Learning)
- Cybersecurity Job Simulation — Mastercard (Forage)

## INTERNSHIP EXPERIENCE

**Cybersecurity Intern — CodeAlpha (Remote)** *1 Month*

- Completed three cybersecurity projects using Python (Scapy) and code review techniques, covering network traffic analysis, phishing awareness, and secure coding practices.

## PRACTICAL PRACTICE & CONTINUOUS LEARNING

- TryHackMe: Solved 9 rooms on practical security concepts (Profile: tryhackme.com/p/pawanpandey9493).
- Following a structured 30-part L1 SOC Analyst learning playlist (ZeroDay Vault) alongside regular Linux and Python practice.

## CORE COMPETENCIES

- Analytical Thinking & Attention to Detail
- Log Analysis & Basic Alert Triage Concepts
- Awareness of Common Attack Vectors (Phishing, Malware, Brute-Force)
- Clear Communication & Incident Reporting

## LANGUAGES

Hindi — Native/Fluent | English — Intermediate
